own his late with every joy, And his form from danger spat thisten, Hurbard, at the latch, Hearthe tapping at the door, me one guided to our thatch, Perhaps a shelter would imploye.

Dismal, dreary, is the night, Thunder rolls along the sky, The wanderer in we'll now invite, Kind relief we no'er deny. Scarce the fickle latch they raise, Alternate now they fondly gaze.

Alternate blend their joyous tears. Twas Edwin sought his rustic home. Enrich'd from India's golden soil, He clasps their hearts no more to roam,

And shield them from domestic toil. To affluence rais'd from humble state, His love, and worth they now discern, They still recount their former fate. And bless their roving boy's return.

A Whisper to a nevely Married Pair ON GENERAL CONDUCT.

Earnestly endeavor to obtain among your acquaintance the character of a good husband; and abhor that sort of would-be-wit, which I have sometimes seen practised among men of the world -a kind of coarse jesting on the bondage of the maried state, and a laugh at the shackles which a wife imposes. On the

and approbation. Independent of better mo-tives, what a responsibility does it free you from! for if the affair tern out ill, you are spared reproaches both from her and from your own feelings. But the fact is, she who ought to have most influence on her husband's mind, is often precisely the person who has least; and a man will frequently take the ad-vice of a stranger who cares not for him nor his interest in preference by the copilal and vice of a stranger who cares not for him nor his interest in preference to the cordial and sensible opinion of his wife. A due consideration of the domestic evils such a line of conduct is calculated to produce, might, one would think, of itself be sufficient to prevent its adoption; but, interpolate of these will y should influence you; for there is in woman an intuitive quickness, a sagacity, a pene-tration, and a foresight into the probable con-sequences of an event, that makes her pecu-Nature. sequences of an event, that makes her pecu-liarly calculated to give her opinion and ad-

may betail her. She may weep over the death of some relative or friend; or her spirits and technics may be affected by various circumstances. Remember that your sympathy, ten lerness and attention, on such occasions are

narticularly required.

A man would not on any account, take a whip, or a stick, and beat his wife: but he will, without remorse, use to her language that strikes much deeper to her heart than the lash of any whip that he could make use of. "He would not for the world," says in ingenious writer, "cut her with a knife, but he will without the least hesitation, cut her with his tangue." I have known some unfeeling husbands, who have treated their luckless wives with unvaried and unremitted unkindness, till the arrival of their last illness, and who then became all assidnity and atten-tion. But when that period approached, their too late: the die is east; and kindness or un kindness can be of little consequence to the poor victim, who only waits to have her eyes closed in the long sleep of death!

Perhaps your wife may be destitute of youth and beauty, or superficial attractions which distinguish many of her sex: should this be the case, remember many a plain face conceals a heart of exquisite sensibility and merit; and her consciousness of the defect makes her peculiarly awake to the slightest attention or mattention from you; and just for a moment reflect-

"What is the blooming tineture of the shin, "O paces of misel and harmony within !
What the height spatisting of the fluent eye,
To the not notabling of a countryly! ?
Can have lense of form, or look, or air,
With locelines of words or decid crempare!
Most though it first the sunway heart man gain;
But these, these only, can the heart retain." Your wife though a gentle, amiable creature, may be deficient in mental endowments, and destitute of fancy or sentiment, and you, perhaps a man of taste and talents, are inclin-

ed to think lightly of her. This is unjust, unkind, and unwise. It is not, believe me, the woman most gifted by nature, or most stored with literary knowledge, who always makes the most domfortable wife; by no means: your gentle amiable helpmate may contribute much more to your happiness, more to the regularity, economy, and discipline of your house, and make your children a much better mother, head and head a sing could trace han many a brilliant dame who could trace with Moore, Scott, and Byron, every line on the map of taste and sentiment, and descent on the merits and demerits of poetry, as if she had just arrived fresh from the neighborhood

THE MORALIST.

LIFE.

Between two worlds, life borers like a star, "I wist night and mera, upon the horizon's verge, How little do we know that which we are! How letted do we know that which we are! How less what we anay he! the eternal suge Of time and tide cuits on, and hears after Off bubbles; as they burst, new immerge, Lash'd from the Earn of age; while the graves Of empires beave but like some passing waves.

A FRAGMENT.

The sun arose on a fine morning in June, in all his brauty and glory; the pearly drops that hung on the spires of the meadows, shrunk away at his approach, the cattle on the mountains rose and stretched themselves in gladness, and regaled themselves on the fich verbure moistened by the morning dew the world -a kind of coarse the world in married state, and a laught bondage of the married state, and a laught bondage of the married state, and a laught the shackles which a wife imposes. On the contrary, be it your pride to calabit to the world that sight on which the world passes such an encomium. Beautiful before God and men are a man and his wife that agree together."

Make it an established rule to consult your wife on all occasions. Your interest is hers and unleitake no plan contrary to her advice and unleitake no plan contrary to her advice have been such as the sate of the field, and the morning and painted it on her check with a soile. At becausiful, said, is Nature. But at evening a sential scene was presented a small cloud which kept rising and which kept rising and painted it on her check with a smile. Ah! beautiful, said I, is Nature. But at evening a different scene was presented: a small cloud appeared in the west, which kept rising and swelling; the vivid lightnings began to streak across his breast, and the distant thunder seemed the foreboler of the tempest; as it approached the zenth, the winds arose, land with a sudden crash tore the hoge boughs from the oak, mighty son of the forest; the beasts of the field looked astonished, and man gazed in amazement. The rain poured down m floods; the lightnings seemed to i flame the whole atmosphere, and joined with the mighty roaring of the wind, an I the crashing

Eternal Hope | when youder spheres unifine, Fealed their first notes to sound the march of une, Thy joyens youth be gare-but not to fade. When at the unter planets have decayed, When rap'd in fire the zeatins of ether glow. And Heaven a last thunder, lookes the world below, Thou, unifiously of, shatto'et the ruins unite, And lift the torch at Nature's timeral pile.

LOVE AND ITS EFFECTS

Love is like honesty, much talked of and little understood: his common sense, valuable and scarce. The miser calls it a had mortgage—the stock jobber, a smising fund—the doctor, a hypochondris—the lawyer, a smi in chancery—a soldier, his parole of honor—and a salor, the maruer's compass. An Englishman in love, amuses himself with—the plue devils; ask him a question, and I'll hold a thousand pounds to a ducat you feel insulted by his answer; for instance—
"Fine morning, Mr. Bull!"

manner here relay on anomal weeks that the devel business have you with my alongs?

An Irishman in love, (and who loves like him /) gets merry with Irishmanon, then exceedingly aweet that it were a pix fletnize d.

"The Englishmare more than a whole him /) gets merry with Irishmanon, then exceedingly in the potatoe flower! Arrah, dear, why will you shall you only ever against little terrence. M'Gladdery? Hav'n't I got a gentale, commodius, lotty, nate little mud chfine? Hav'n't I got an empty flower garden, tuil or potatoes? Otherwey? Otherwey? veer since you stole my heart, I feel at banging against my risk, just like the pendulum of a cuckou by my risk, just like the pendulum of a cuckou by manifely flower, widout you be mone, poor Terrence will be after dying an outli maid! By the powers of butternulk, kell just go off like the sauff of a rushlighte—so he will?

A Scotchman in love, taks a pickle o' demanded to wie castell appertained,

M'Cree's pawky ce'n thirt ye through! Ruise ye '-ruise ye, chiel!" O. Sawney, Sawney! len' me ye'r lug a wee bit, my discreet frien', and keep a secret. It's no her twa gim'let ce'n, or her painted face, I'm courtin': it's her siller! her siller! her siller! her siller! as silly as the yeats on his mountains, refuse leek porrider.

goats on his mountains -refuses leck porridge and toasted cheese—thus proving the power of the blind archer to be the same in every country. "Poor Shenkin ap Morgan ap country. "Poor Shenkin ap country. Shones, pe ferry pad-hur heart go pit-a-pat,

And Shenkin and Winifred soon will be man

tioner's ice-house, and a Spaniard as hot as a grill'd devil: a Lawyer in Love, pleads away his soul, and a love-sick Doctor physics away his soul—by the bye, a doctor must be sick indeed, when he takes his own physic; a Musician in love, fiddles away his soul, and a

PHILOSOPHICAL EXPERIMENT.

PHILOSOPHICAL EXPERIMENT.
Professor Von Poddingcoft (or puddinghead, as the name may be rendered in English.) was long celebrated in the university of
Leyden, for profound gravity of deportment,
and a talent at going to sleep in the midst of
examinations, to the infinite relief of his hopeful students, who thereby worked their way
through college with great ease and little
study. In the course of one of his lectures,
the learned professor actions a bucket of wastudy. In the course of one of his lectures, the learned professor, seizing a bucket of wa-ter, swung it round his head at arm's length: the impulse with which he threw the vessel from him—being a centrifugal force—the refrom him—being a centrifugal force—the re-tention of his arm operating as a centripetal power, and the bucket, which was a substitute for the earth, describing a circular orbit round about the globular head and ruby visage of Professer Von Poddingcoft, which formed no bad representation of the sun. All of these particulars were duly explained to the class of raping students around him. He arrived gaping students around him. He apprised them, moreover, that the same principal of gravitation, which retained the water in the bucket, restrains the ocean from flying the earth in its rapid revolutions; and he farther informed them, that should the motion of the earth be suddenly cheeked, it would incon-tineatly fall into the sun, through the centri-

friendship, and soley promise to preserve it as long as the sun moon shall undare. See him then with lompaneous on the sole basis of religion, noty and universal love, adopting at the fixental maxims of his government the thanded down to as from Heaven, "GI o tool on high, and on earth peace and good to all men."

In 1190, Richardred the crimade with Philip Augustus obnice, but a division taking place between two princes, the latter returned to Er. Richard remained in the east, where displayed to common valour against Sal whom he defeated near Casarea, and by make a frace, em nin love, amuses himself with—the blue yells; ask him a question, and I'll hold a busand pounds to a ducat you reel insulted his answer; for instance—

"Fine morning, Mr. Bull?"

B. I've seen thousands finer!

"How are you to day, sir?"

B. Don't know—ean't tell!

"What ails you, friend John."

B. What the devil business have you with the shore of the seed his ancient we be a long of the seed by Leopole, I as Advertis, to we as made for some time, until descriptions of the seed of

snecshin, frac h's muil, an' whyles claws his clbows when it disna yok. "Hech, Donald, man! what i' the muckle deil's name's come ow'r ye noo! Fye, fye! dinna let Maggy M'Cree's pawky ce'n thirl ye through? Ruise ye!—ruise ye, chie!" O, Sawney, Sawney! len' me ye'r lug a wee bit, my discrect frien, and keep a secret. It's no her twa gim'let ce'n, or her painted face, I'm courtin': it's her siller! her siller! her siller! her siller! bin detained there more then the space of a years. When Blondel heard this, he wrought such meanes that he became acquainted with them of the castell, as minatrels doe easily win acquaintance any where hut see the king he could not, neither understand that it was he. One day he sat directly before a window of the castell where king Richard was kept prisoner, and began to sing a song in French, which king Richard and Blondel had sometime composed together. When king Richard heard the song, he knew that it was Blondel that sung it, and when Blondel paused at halfe of the song, the king began the other halfe and completed it. Thus Bondel won knowledge of the king his maister, and returning home into England, made the bacons of the countrie acquainted where the king was."

This happened about the year 1183, he was This happened about the year 1183, he was at length ransomed by his subjects, and in a war after a rads with Philip, he invaded France, and in hesieging the castle of Chalons, was killed by an arrow in the forty second year of his age. Under Richard, the minstrel art ac quired additional splendous: he was not only the great hero of chivalry but the patron of poets and minstrels. He was himself of their number, and some of his poems are still extant.

The following passage is from Buckminster.

'If any thing in life deserves to be considered as at once the exquisite bliss, and pre-eminent duty of a mother, it is this,—to watch the dawning disposition and capacity of a favorite child; to discover the earliest buds of vorite child; to discover the earliest buds of thought; to feed with useful truths the inquisitiveness of a young and curious mind; to direct the eyes, yet unsulfied with the waters of contrition, to a bounteous benefactor, to lift the little hand, yet unstained with vice, in prayer to their Father who is in heaven. But so it is. The child, as soon as it is released from the bondage of the nurse, and needs us longer a careful eye to look after its steps, and guard it from external injury, is too often surrendered to instructors, some of whom are employed to polish the surface of the character, and regulate the motions of the limbs. ter, and regulate the motions of the limbs, others to furnish the memory, and accomplish the imagination, while religion gets admission as she can, sometimes in aid of authority, and

since an intellige quickness, a signify, a prior training and a significant property and a significant

THE MISCELLANIST.

CREDULITY.

CREDULITY.

One of those gentry who get their living by their wits, lately arrived at a town in England, and advertised a bill of performances by five Arabian conjurors, among which was the following: "They are all brothers by the amo father; their names Maley, Benasser, Abdallah, Mustapha, and Suckee. At the conclusion of their never yet-equalled feats of alighted to faint, legerdensin, &c. they will take each a lighted torch in either hand, when lot incredible to relate! Suckee, with the burning torches, will jump clean down Mustapha's throat, who, in an instant, with equal dexterity, will jump down the throat of Abdaffah, den Abdallah will jump down that of Benasser; and Benassar down his brother Muley's, who, lastly, notwithstanding he is incumbered with his four brothers, and eight torches, will throw a flip flap summerset down his own himst.

The house was crowded to overflowing, but, unfortunately for the sudience, the conjurous, after getting the money in their pockets, jumped down their own throats before the performance began, and were never seen afterwards, one item only of the bill being a whibited that of leaving their dupes completely in the durk.

SMELLING AND TASTING.

If a person be hood winked effectually, he will, with difficulty, if at all, recognize the difference between rum, gin and brandy; but if, heades having his eyes bound up, the hosteris are closed by pressure of the fingers, all distinction in flavour between these very dissimilar aparits will be confounded. To exhibit this phenomenon in a more effectual manner, the three glasses of spirits ought to be presented successively to the person upon whom the experiment is to be made, who ought to sip of each before he is called upon to decide upon them singly; then put him to the proof by giving him the glasses over again, and he will be found so entirely at fault, that if he make the experiment a dozen times, he if he make the experiment a do-en times, he will, in all probability, not pronousce correct-ly above three or four times, and that will be purely accidental.

Objects Of PHRASES.

To Ride the Road. — It to gover, manage, or preside ever a Johnson observes, that it was one sally written Road, which signified a furnally and then implied to direct the rabbic.—

Bradey's Vareities of Life.

EDUCATION OF YOUTH.

The right education of Children is a thing of the greatest importance, both to themselves commonwealth. It is this, which and the commonwealth the natural means of preserving religion and cirtue in the world, and the earlier good instructions are given, the more lasting will be their impression. For it is as unnatural to deny these to children, as it would be to

and a close application to business, that is the only barrier to keep out the enemy, and save the future man."

3. Parents themselves should endeavour to be sensible of their children's defects and want of parts, and not hisme the master for neglect, when his greatest skill, with some, will produce but a small share of improvement, that the great misfortune is, as the proverbex presses it, Every bird thinks her own young the fairest; and the tender mother, though her son be of an ungoversable temper, will not scruple to say, be is a neck child, and will do more with a word than a thow, when neither words nor blows are available. On the other hand, some children are of a very dull and heavy disposition, and are a long time in gathering but a little learning, and yet their parents thank them as capable of instructions and promising parts; and when it happens that they improve but slowly, though it be in proportion to their own abilities, they are that they improve but slowly, though it be in proportion to their own abilities, they are hard promising parts; and when it happens that they improve but slowly, though it be in proportion to their own abilities, they are hard promising parts; and when it happens that they improve but slowly, though it be in proportion to their own abilities, they are hard promising parts; and when it happens that they improve but slowly, though it be in proportion to their own abilities, they are hard they improve but slowly, though it be in proportion to their own abilities, they are hard they improve but slowly, though it be in proportion to their own abilities, they are hard they improve but slowly it and the proportion to their own abilities, they are hard to be ability and the proportion to their own abilities, they are hard to be ability to the proportion to their own abilities and the proportion to their own abilities, they are ability to the proportion to their own abilities and the proportion to the proportion to should be abilitied to the proportion to the proportion to the pr they lose that share of learning, which other-wise, by staying at the same school, they might have been masters of the like a sick but impatient man, who employs a physician to cure thim of his malady, and there are the distemper requires time as well as skill to procure his health, tellshim, 'he has ail along taken a wrong method,' turns him off, and then applies to another, whom he serves in the same manner—and so proceeds till the distemper process incorable.

4. It is bigidy necessary that children should be early made sendals of the scandal of the line along the to this send parents must netulate.

4. It is bigidy necessary that children should be early made sendals of the scandal of the line along the to this send parents must netulate.

be early made schedule of the scannia of tell-ing a lie to this end parents must inculosite upon them, belones, that most necessary vir-ture of speaking trath, as one of the best and attempted bands of luman society and com-merce, and the foundation of all moral ho-

April 1, 1226.

April 1, 1226. very promising genus) ought to be discouraged between, lest it should betray them into that vide sin of pulsering and purleining in their riper years, to which the grand enemy of mankind is not wanting to prompt them by his suggestions, whenever he finds their relinations have a tendency that way.

6. Immoderate anger and desire of revenge must never be suffered to take rout in child.

must never be suffered to take root in children. For, as a most reverend divine observes, if any of these be cherished, or even ist alone in them, they will, in a short time, grow headstrong and unruly; and when they come to be men, will corrupt the judgment, turn-good nature i to humour, and understanding into prejudice and wilfulness."

7. Children are very apt to say at home what they see and hear at school, and often time, more than is time, and name peach, as

times more than is true, and some parents as often are weak enough to believe it. Hence are those great uncasinesses between the parents and the master, which sometimes are carried so high, as for the parent, in the pre-sence of the child, to reproach him with hard names, and perhaps with more abuseful lanage. On the confrary,

proce in their learning, they must cause them to admit to the little (imaginars) hardships of the school, and support them under them of the school, and separate the school in-by suitable cocouragements. They should have fall out with the master upon every idle tale, nor even give their children the liberty of many themselves that way, but they requestly, should, by all means, inform their frequently,
"that they ought to be go it boys, and learn
their hook, and always do as fiver master bids
them, and that, if they do not, they must undenge the pain of entrection." And it is very

with which they are treated, that the Weblanz descended from the missiers of the island. Every Englishman knew something of foreign parts—of the continental construct—of Anis, parts—of the continental construct—of Anis, Africa, and American But of Wales he wend to this, that exuel delight which some are seen to this, that exuel delight which some are seen to this, that exuel delight which some are seen to this, that exuel delight which some are seen to this, that exuel delight which some are seen to the continental construct—of Anis, Africa, and American But of Wales he wend to know in more than he does of the incide of the Chinese expires it is a little spot of earth, which appears to have entirely encaped his observation and inquiry.

In the Ukrain, when a young weman falls in the Little of the Scholl should not be sent and the continent of the word of the sent the least adalament of the good of the insensible amain pretend any excuse, she believes the continent in the most tender and pathetic manner, and to promise the most submissive observations of the insensible amain pretend any excuse, she believes his content a and accordingly, faking up lodging, remains there till induced the time of health, sometimes with a fix of the parents joining their friends should not be sent an hour or two after, the editor consents, however unwith the attended to the other consents, however in the delight which some are seen the special constitution of the sent and sometimes with a fix of the parents joining hands with the school and the contract of the parents joining hands with the school and the parents joining hands with the school and the parents joining the contract of the parents join their master, their friends think it time enough to come to school at nine in the morning, be-cause the weather is a little cold, or because they must have their breakfast first. I say, pa-rents should not act so indiscreetly, because it clips the wings of the master's authority— it makes boys first despise and undervalue their teachers, and then become accuracy. their teachers, and then become unmannerly and impertment to them: correction for which makes the tutor hated by the children, and then there naturally follows either a total dis-

regard to business, or a general carelessness in every thing they do. And, While I am speaking of the education of While I am speaking of the education of children, I hope I shall be forgiven, if I drop a word or two relating to the fair sex. It is a general remark, that they are so unhappy as seldom to be found either to spell, write, or cypher well; and the reason is very obvious. situe in the world, and the earlier good instructions are given, the more lasting will be their impression. For it is as unnatural to deny these to children, as it would be to withhold from them them necessary subsist ence. And happy are those, who, by a religious education and watchful care of their parents, their wise precepts and good examples, have contracted such a love of virtue and hatred of vice, as to be removed out of the way of temptations. And it is owing to the way of temptations. And it is owing to the way of temptations. And it is owing to the way of temptations. And it is owing to the parents, those twice, because they do not stay at their wise precepts and good examples, have contracted such a love of virtue and hatred of vice, as to be removed out of the way of temptations. And it is owing to the way of temptations. And it is owing to the parents, those though the expected. This great omission being, to the most part, chargeable on the parents, I hope the following particulars will not be taken amiss. And,

1. A constant attendance at school is one main axis whereon the great wheel of expected them, which is commonly made by parents, be true, that the masters have hobelays enough of their own masking, there is, by their own confession, no necessity for them to make an addition.

2. Parents should never let their own command run counter to the master's, but whatever task he imposes on his pupils, to be done at home, they should be careful to have the first principles of learning so fast as younger ones. For a proof of this, I appeal to whatever task he imposes on his pupils, to be done at home, they should be careful to have the first are from the ready use of the prove in the first principles of learning so fast as younger ones. For a proof of this, I appeal to the particular that is the conty harden of the cannot have a first principles of learning so fast as younger ones. For a proof of this, I appeal to have a first principle of the ready use of the principle of the particular to keep out t

It is not that they ought to be good boys, and learn there book, and always do as their master hids them, and that, if they do not, they must undere the pain of espection. And it is very endanced in my communication, with each the master and the scholar, when the latter is taught to love and have a good opinion of the former, and then with what pleasure does the scholar learn! With what pleasure does the prace, good harmony, and freendship among his schodars, they are generally taught the reverse at home. It is indeed but too common for children to encourage one another, and be encouraged by their friends, in that savage and brutal way of contention, and to gove the last blow, if not the first, whenever they are proposed; forgetting, at the same time, that to teach dissiders betimes to beyond harmon for the first, whenever they are proposed; forgetting, at the same time, that to teach dissiders betimes to love and be good natured to others, is to lay early

Pray do, Mehres, Editore, you to whom, according to some own belief, these ideas 'are not to tirely masel,' let me entreat you, throw your lig upon this matter, 'It will not cost you much, on to say of 'an thribwa' in, indeed, the verb, as what to call 'upon,'—Not an adverb, I hope, or a preposition. Purlangs, in your wisdom, you well the whole phrase a rugged 'anomaly,' wa desing about, vagrant like, through the extensivegious of the language, and too unsocial in unture to be admitted to a settled residence and of its contons, or at once pronounce it let my of its cantons; or, at once pronounce it English, and thus deter the world from any fa-

heey. I sm, Gentlemen Editors, with greatest respect your much oldiged, humble servait.

MARTIN ROLHE.

S. Sh et. No. 211, between Lambard & South et.

FOR THE SAFEBRAY EVENING POST TO MY MOTHER IN HEAVEN. "I mourn the new because I mourn in vain," If ever the spirit rom mansions on high

He visite the blesk world of wor. Oh! say, wilt then come from thy home in the sky. To us, the poor mourners below? Then hover I peay thee awhile o'er the head. Of thy and and disconsolate child; And seek the soft balm of composure to shed From pain and from sorrow beguild.

For what are the charms that this world can be art To the besore shandon'd to grief, What pleasure can seek the deep wounds of the heart,
And give to its anguish relief?

For what are the thoughts on my spirits that press, White vainly and sailty I sich They dwell on thy death-led-that scene of distress, With the last dying look of thise eye. I grand on that brow as 'twas pallid and cold,

I beard but the faultering hereb. And saw at that moment, with to longs unfold,

As he comes 'mal the dews of the morn, And mark his soft tints on the features of even. In hopeless despondence factors.
For nature thus smiling is maching my wae, And nought seems my serrows to share,

Sive the winds of the winter, now marining low, Like the deep dreamy notes of despair. and I think, as I list to that desolate tone, I has the winds are thus nourning for thee And now in these basints where I wander alone, Convene here with sorrow and me. Ah! time shall fly on—and when years past away, With the world I may mincle again;

But never from thee shall the memory stray, With all its deep mountainess then. For long as I pass thro'this valley of care, The night and the tear shall be given; The tendering er, and the wish and the prayer, her now sainted in Heaven.

Princeton, F. b. 20.

New York, March 29.—Information having been received at the Police Office, that there was a noted French gambling house at No. 42 Broad street, at which not even the subbath produced a cessation of their crimi-cal practices, a domiciliary visit was determinof upon on Sunday evening last. According-y, Tillou, with 1 other constables, and 18 satchmen, proceeded to the premises, be-ween 9 and 10 o'clock of that evening. No natimation had escaped of the intended visit, nd the surprize was complete. Forty-three amblers were found in full play, all but 3 of whom a motley company of black legs, would be gentlemen—the cheater and the cheated, e arrested, and gallanted off to the watch e. One of the three who escaped, dash through a second story window, carrying av the sush upon his neck, in the manner he English patent life preservers.

MR JEFFERSON.—We copy below an attract of a letter from Mr. Jefferson relative to the contemplated lottery for his relief. The cheme of the lottery is advancing, with tare d rapidity, the surveyors are laying off and the commissioners fixing their and it will not be long before the dend Enquirer.

Entract of a letter from Mr. Is fferen.

"I knew that my property, if a fair market tould be obtained, was far beyond the amount fmy debts, and sufficient, after paying them to leave me at ease. I knew, at the same on leave me at ease. I knew, at the same one, that under the present abject prostration of agricultural industry in this country, to market exists for that form of property.— I long succession of unfruitful years, long outlined low prices, heavy tariffs levied on his and other branches to maintain that of hamfactures, calamitous fluctuations in the alue of our circulating medium, and, in my ase, a want of skill in the management of our and and labor, these circumstances had been one undermining the state of agriculture, had een breaking up the land holders, and land arket here, while drawing off its bidders to cople the western country. Under such counstances, agricultural property had been no resource for the payment of debts.— obtain a fair market was all I wanted, and is the only means of obtaining it. The idea obtain a fair market was all I wanted, and sthe only means of obtaining it. The idea a, perhaps, more familiar to me than to unger people, because so commonly prac-ed before the revolution. It had no con-ction with morality, although it had with pediency. Instead of being suppressed, refore, with more games of chance, bute-a had been placed under the discretion of the right ways as a reason of markings of the legislature as a means of sometimes effect ether my case was with a the range of tha erction they were to judge, and in the in-rity of that judgment, I had the most per-

ct confidence.

"The necessity which dictated this expe-ent cost me, in its early stage, unspeakable optification. The turn it has taken, so much eyond what I could have expected, has coun-realled all I suffered, and become a source felicity which I should otherwise never have lown."

THE PANAMA MISSION

On this subject, the following remarks of eloquent Chateaubrand will be foun I in-esting, for which we are indebted to the Bos-Repertory :- " The most important fea-e in the foreign policy of the Anglo-Ame ins, is the sending an ambassador to the ongress of Panana, a resolution when, wed by a prudent choice of the person to e sent, may consolidate the liberty of a whole misphere! For we cannot conecal, that the panish Americans have great need of the panish Americans have great need of the punsels of a nation more experienced in the areer of independence. Descending almost artirely from the ranks of privileged easter, or from the military class, the distinguished men in these new states have rather patriotic and generous sentiments, than administrative and political ideas. Let them study the pro-gress of the United States—at the same time grise and energetic, let them establish prompt. wise and energetic, let them establish prompty regular finances and respectable fleets, organize their constitutions so that they may skilfully lead a multitude, still ignorant and indolent; introduce with prudence theirty of worship, of opinions, and of industry—let them form their Cabildo upon the plan and in the spirit of the Anglo-American municipalities and provincial assemblies, (the only real and solid foundation of free government)—nawke also reason, which slumbers among a neurile accustome the action of municipe, and

Green Itoom Intelligenée.

Mrs. Mangeon's reception at our theatre on Wednesday evening, was quite favourable. She

sance to the Congress and noblesse of the prequently the most astounding applause gone to the "tomb of the Capulets." And now is shook the very walls of the building. All the airs were received in the most enthusiastic manner, indeed, the mosic is every way enti-tled to it. At the end of the first act, the e the eastern Portico of the Pantheon, at composer was called for, in order to receive the most flattering marks of appr bation, a cown Zibetum commune occidentale to the circumstance which, to our knowledge (says the Bellia edited by the Court of the the Berlin editor,) never happened before in the Opera, he was again obliged to show him-self, when a thundering of applause took place, such as never before was remembered upon any occasion. Mr. Von Weber sets out almost immediately, by way of Paris, for London, with a view to bring out in March, the new Opera of Oberon.

Wbening Post. PHILADELPHIA.

SATURDAY, APRIL 1, 1826.

"The Genius of the Harp, No. 2," by "Emily"—" Character of Bonsparte"—Lines to the "Boston Bard"—"Hope"—" Greece to the "Boston Bard"—"Hope"—" Greece and Turkey," and one or two minor articles, from the "Milford Bard"—" Edward"—"To Peter Single, from his Aunt"—" Skeleton of the Wreck,"—Village Ta'es, No. 2"—and lines from "William to Mary," are received since

the Wreck"— Village Ta'es, No. 2"—and lines from "William to Mary," are received since our last.

"Philadelphia Displayed," next week.

"Peter Quiz" has sent us, from New Castle, several Enigmas, but neglected the prerequisite to insertion, of accompanying them with the solutions.

A fourth epistle from "Obad'ah Shameface," exhibits a sensible improvement—his request shall be complied with.

Our friend "Jernus" is revelling among the blessings and heauties of Lancaster county; and since the tde of his imagination runs so high, that he assures us, in a private note recently received, and of which this will for the present suffice as an acknowledgment, that he is actually set down in the "land of milk and honey"—where the Elysian fields are in contrast but quagmires, and the ideal paradise of M Iton dwindles into comparative ugliness, we include the anticipation, that the gentle muses, who are particularly partial to the charms which exist among shady groves and green vales, where the yellow cowshps and early blossoms of spring are watered by the sparkling waterfall, the purling brooks, revulets and streams, and all that kind of thing. one sparkling waterfall, the purling brooks, rivulets and streams, and all that kind of thing, will shower down some of their choicest fa-vours upon the prolific imagination of our en-thusiastic correspondent.

ons and daughters in relation to the religious and political institutions of the United States, is recived—the sentiments advanced in this little address, are for the most part correct, prompted no doubt, by worthy motives, and exculated, it acted upon, to produce results favorable to the cause of morality and learning, although the portion headed " Prench Boarding Schools," seems to have been written under the influence of some ecret and peculiar sorrow, and it must be confessed is not exactly in accordance with the enlightened spirit of benevolence and theralay which should distinguish an attempt like this to disseminate correct and victuous principles. It ever has been, and we ever desire it to be, an ixion, with us, never to permit in our pages writings inder any sembiance whatever, which might be calculated to wound the feelings, whether political, ocial or religious, of any individuals or seet, or nation, from whom we may chance to differ .-While we respect the private griefs which appear to have led to this expose, and honour the piternal solicitude displayed in this trief address, we shall transfer to our paper such parts as are con-sistent with the regard which is justly due to the feelings and even the prejudices of others.

exertions have been made in behalf of the in lividual so long and so well known to the reading public as the "Boston Bard." His productions have obtained him many admi ers here; and it has been suggested, that i lirect appeal to the friends of true genius ave felt a disposition to contribute something s an indication of their feelings to his meri is a native pact, have been prevented from o doing, from the absence of a convenient and proper channel of communication. From hese or similar considerations, we have heare t intimated, that an appropriate public ad dress will shortly be delivered, by a gentle man of this city, intended as an appeal to hi friends, in behalf of the Boston Bard-due notice of which will be given.

Since the happy recommention of the wars which for so long a period had kept the nations of Eunewske also reason, which slumbers among a people accustome it to a state of pupilage, and develope peace ably the powerful germs of activity, which certainly are not waiting to the countrymen of Mina and of the Baron Mercesting and lightly inspectation of the Baron Mercesting and the states of the state of the stat them the empire of persuasion and friendhp—let her show herself frank, disinterestnd, great, and generous. The noble post of
beingast the head of a new world, is certainnd well worth the serifice of a few dollars in
duties, and a few bales of cottou."

SMITH, in the 66th year of her age.
On Thursday evening, of a short and severe illtered on their "engagements," but may "shortly be expected" to make their "first appearance this season," and render our gardens, groves and walks vocal with their liquid strains of soft delight poured harmoniously forth beneath the mild, and bright, and beautiful sky, which, by the bye, all this display is to be " brought forward," and all will, we have no doubt, be well calculated to dispense, besides the blessings of health, peace and sevenity, no small share of amusement to a numerous, delighted, and admiring audience, as " the friends of the drama" say, and as we now take the liberty of repeating.

The late Mr. Gaillard was brought into pub he late sir. Galliary was orough thropus-lic life by friends, whose object was to with-draw his attention from the contemplation of an overwhelming domestic calamity, over which he had long brooded in solitude. The youthful and lovely partner of his bosom, toether with an infant daughter, perished be gether with an infant daughter, perished be-fore his eyes in the Santee. He was over-whelmed with gricf, and gave himself up to solitude and despair. He would sit motionless, it is said, for days, with his hat drawn over his eyes, and head thrown on his bosom. From this situation he was forced by his friends, who, after many efforts, succeeded in drawing him within the circle of social and lrawing him within the circle of social and

EDIT AL QUARRILS A CAGOLI, Let dogs delight to back and lott. For its their measurement and light, For tool halfs made them so. For tool halfs made them so. that Feirs should never let back many because reco-last percent C. were letter made To trough such others Fr.

The special results R.—, a Minister of Scot-land, bad a halfs of asking so many ques-tions in a breath, that he could get a reply to none of them. Once, however, he must will a person who was able to accommodate turn. Goding home from a Sacrament by a montand road, and coming to arrive a tord, he that a woman who had crussed the river with that a woman who had crossed the river with a sack of meal upon her back, whom he this accorded, "Weeff, Jany, how's a wi'you !—How far is it to Jadiant !—How deep is the water! What's the proce of your neal!" You what she replied, "Yera weeff, I thisk you, Sir—twa mile, untille deep, and a saxpence." One of the courtiers of William the lid, being asked by his fainds, why one of retablished character for courage and good is not would answer the challenge of a coaronia, he cookiesed that "for his own sea he could asfely trust their judgment; but how should be appear at night before the mains of honor!"

A gentleman lately took the following me-

A gentleman lately took the following meta-testification of the strenger of th

hary, a thick log, and a few mannes of right hing. Charles II, who was black browed, and of a swarthy complexion, passed a pleasant remark upon the grim looks of the munderers in Macbeth, when, addressing his attendants, he said, "Fray, what is the meaning that we never see a rogue in a play, but oddish they always clap him on a black periwig? when it is well known that one of the greatest it is well known that one of the greatest play and brown that one of the greatest play and the greatest

The allusion to the fair wig was supposed to

The allusion to the fair wig was supposed to apply to Titus Oates.

When I hear two polegnics making a great deal of noise on points very subtle, and therefore a composition of the conting but two sour apples roasting before a kitchen fire—there is a constant sputter between them. It meems as if they were debating short something, while all the noise proceeds from the same cause—acidity and heat.

AGRICULTURAL.

FIGURE TREES.

The new method of raising fruit trees by planting the scious, is a great desideratum in the art of obtaining choice fruit.

It has more advantages over grafting, because it is more expeditious, and requires no stalk or tree. They may be planted where they are required to stanting.

ACRICULATING LIBRARY.

The method of propering is as follows: Take the scious are obtained. The method of preparing is as follows: Take the scious are for engralting, and at any time after the first of February, and till the buds begin to grow considerably, and day each end of the shoots in melted pitch or wax, rosin and tallow, and bury it in the ground, the buds upperment, whilst the body are desided to the extent of John Lysinger.

NOTICE.

A Li, persons addited to the extent of John Lysinger. and do each and tallow, and bury it in the ground, the buds uppermest, whilst the body lies in a horizontal position, and at a depth of two or three inches. We are informed that trees obtained in this way, will bear in three or four years from the time of planting.

PLANTING POTATOES.

Potatocs should never be planted whole, whatever may be their size, as they all produce the same number of shoots, almost mwariably five, which is too great a number to be together, in order to make a good crop.— As the whole potato, however large, or how-ever many eyes, (or bods,) it may have, never produces more ti an five shoots, which are all ever many eyes, (or buds,) it has nave, never produces more it an five shoots, which are all from the end salveree to the stem, care should be taken that they are cut longitudinally, which, whether taived, or quartered, is likely to divide the productive buds among the several parts. One third of the stem end should first be cut off, which is without a huddithat will not produce a shoot, but is valuable, for the table or stock, and of no service to the planted part. It is therefore a saving that ought never to be omitted. Thus prepared, the potatoes should, if planted in rows, be from eight to ten inches apart, if in hills, three or four pieces in each. Great care should be observed not to have the furrows, or treaches for planting, deep. Hills, in which they are acklom planted below the surface of the earth, generally produce the finest face of the carth, generally produce the finest
